

# MILESTONES IN TIME

Milestones in time...

**BMM Growth**

# A New Sunrise

At the time when the country witnesses revolution in the export and infrastructure industrial domain, several entrepreneurs had carved a niche for themselves while contributing enormously to the nation's economy.

The BMM group was among the trendsetters in their respective field. Their founder, Late Udaychand Singhi was a highly visionary with extreme dynamism, also being sincerely committed to the society and environment.

Initially set up in Bellary and Hospet sectors BMM gradually acquired additional mines to hold 26.2 hectares of captive land with deposits of 60million tones of iron ore.

Such was the commitment of the founder, with the efforts of his dedicated staff, that what began as a humble mining operation could witness a production of 2.5 million tones of iron ore during the year of 2006 -07.The resultant profits of the whopping 35 million USD bears testimony to the expertise and tremendous growth of the company.

## THE DRIVING FORCE

In 1998, Mr.Dinesh Kumar Singhi took charge of the company. He steered the company to unparalleled growth by being the first mine owner, establishing a power generation plant for captive use, and creating a steel plant from the captive ore mined out for BMM Mine Hills. His inspiration to the team's performance brought about consistent increase in production over the years.

A major breakthrough for BMM came by in 2001 when Govt. of India provided them with license to export through private channels. Under the leadership of Mr.Singhi, the company successfully diverted a considerable amount of production towards exports and having gained firm ground, BMM now aims to export 5 million tones of iron ore by 2008.

## A REALM OF POSSIBILITIES

The group diversified from its tradition business by setting up a Power Plant, Sponge Iron Plant, Billet and TMT rods Manufacturing plant, Beneficiation and Pellet Plant. The purpose of establishing a Power and Steel plant was to create employment, ensure optimum utilization of natural resources in the country and to gain self sufficiency in products like TMT rods and billets which in turn fetch competitive prices in the domestic market. In entirety, with a sense of responsibility towards the society and environment, BMM has constantly striven to offer end to end products from Iron Ore to Power...to Steel, and in recognition to this, has several laurels for providing quality products and delivering value added services to its customers.

THE GENESIS OF A NEW REALM OF POSSIBILITIES FOR THE PRESENT AND FUTURE

1976 : Late Shri Udaychand Singhi initiated iron ore supply to MMTC

2001 : Govt. of India permitted supply through private channels and opened up a new possibility for the mine owners to explore the global markets.

2003 : Conceived the steel plant to generate 1,00,000 tons TMT Bars annually; involving a  
Sponge Iron Plant  
Induction Furnace  
Rolling Plant

2005 : A Power Plant of 25 MW was planned and executed in 17 months for captive usages of steel and power requirements.

2005 : A Pellet Plant has been constructed with the Beijing Shogun of Design Institute to generate 1.2 MT

2005 : An Iron Ore beneficiation plant based on technology of Metso Minerals has been constructed to produce 1.3 MT of iron ore concentrate.

2007 : The plant for pellet and beneficiation is ready for production from Jan 2008
